

Prepared by the U. S. Army Topographic Command (AJEL), Washington, D. C. Compiled in 1954 by photogrammetric methods and from aerial photographs taken 1952-53. Photographs field annotated 1953. Revised in 1975 by the U. S. Geological Survey from aerial photographs taken 1974.

1:250,000-foot grids based on Texas coordinate system, central and north central zones.

Location of geodetic control established by government agencies is shown on corresponding 1:250,000-scale Geodetic Control Diagram.

TO GIVE A STANDARD REFERENCE ON THIS SHEET TO NEAREST 1000 METERS

SAMPLE POINT: FOREST

1. Read letters identifying 100,000 metre square in which the point lies.

2. Read number identifying grid line to left of point and number of grid lines to left of the line either in the top or bottom margin or in the line itself.

3. Estimate meters from grid line to point.

4. Locate line in horizontal margin on the right margin or on the line itself.

5. Estimate meters from grid line to point.
